PROFILE

Motivated and detail-oriented Software Developer with hands-on experience in Java, Spring Boot, Spring Security, and Microservices. Skilled in building secure, scalable RESTful APIs and working with MySQL and MongoDB. Strong understanding of the software development lifecycle (SDLC), debugging, and performance optimization. Excellent communicator and team player with proven ability to collaborate effectively in cross-functional environments. Eager to contribute to innovative software projects in a collaborative environment, leveraging my skills in Java and Spring Boot to deliver high-quality enterprise solutions.

SKILLS

Programming Languages: Java, JavaScript (Basics), Python (Basic), C/C++ (Academic)

Frameworks & Tools: Spring Boot, Spring Security, Hibernate, Microservices, Git

Databases: MySQL, MongoDB (SQL & NoSQL)

Web Technologies: REST API, HTML, CSS, JSP

Concepts: SDLC, RESTful API Development, JWT Authentication, Defined Benefit (DB) Domain Fundamentals, Debugging, Cloud Basics (AWS & Azure), Software Testing (Unit Testing)

Other Tools: Postman, Maven, IntelliJ IDEA, VS Code

PROFESSIONAL EXPERIENCE

Java Developer- Hema Enterprises Private Limited

10/2024 – Present
Cuddalore

- Designed and developed enterprise applications using Java, Spring Boot, and MySQL.
- Built secure and scalable RESTful APIs with JWT Authentication and Role-Based Access Control.
- Participated in peer code reviews, end-to-end testing, and debugging to ensure high-quality deliverables.
- Delivered features aligned with client expectations within performance and delivery standards.
- Collaborated with cross-functional teams to ensure timely completion of assigned modules.

PROJECTS

Outlet Approval System

- Implemented a structured workflow for trainer approvals with image validation using OpenAI API.
- Designed microservices for approval, user, and image-handling components.
- Automated repetitive validation tasks to enhance approval workflow efficiency.
- **Tech Stack:** Java, Spring Boot, Spring Security, MySQL, REST API, JWT

Sports Management System

- Built a real-time sports platform with WebSocket integration for live score updates across clients.
- Enhanced server efficiency and minimized latency using optimized threading.
- **Tech Stack:** Java, Spring Boot, WebSocket, MySQL

Billing System

- Developed a supermarket billing application that generates invoices and detailed sales reports.
- Integrated MongoDB for efficient data storage and high scalability.
- **Tech Stack:** Java, Spring Boot, Spring Security, MongoDB, REST API

Livewire

- Managed 12-stage structured updates between company, trainers, and salons for transparent workflow.
- Implemented role-based access and approval validation.
- **Tech Stack:** Java, Spring Boot, Spring Security, MySQL, Microservices

Retail EZ Return

- Built an end-to-end retail return management system handling AWB tracking, QC inspection, logistics, and SAP invoice reconciliation, with automated vendor data processing and reporting.
- Implemented secure role-based access (JWT) and a multi-stage QC workflow with ASIN-level inspection, bulk updates, and real-time dashboards.
- **Tech Stack:** Java, Spring Boot, Spring Security, MySQL

EDUCATION

Bachelor of Engineering (B.E.) – Computer Science and Engineering

2020 – 2024

University College of Engineering, Villupuram (2020 – 2024)

Villupuram

CGPA: 8.0 / 10

CERTIFICATES

- Java Programming
- Spring Boot and REST API Development
- JavaScript-GUVI

AWARDS

- **First Place** – Paper Presentation at National-Level Symposium, Achariya College

STRENGTHS

- Strong debugging and troubleshooting skills
- Excellent teamwork and communication
- Quick learner and self-motivated
- Good understanding of backend and frontend integration

DECLARATION

I hereby declare that the information provided above is true and correct to the best of my knowledge and belief.
